Educational objectives

SPECIFIC LEARNING OBJECTIVES

The educational programme of the 2nd cycle Degree Course in Economics and Finance aims at providing students with an advanced knowledge of economic and financial disciplines, completing and refining the knowledge acquired in the curricular courses of class 33 and raising the quality standards to levels close to those achievable in other European Union countries.

This objective is achieved through the advanced study, during the first course year, of economic analysis and policy, of the business sciences most connected to economic science, with the addition of advanced legal disciplines and mathematical-statistical disciplines and further knowledge of the English language. The course may subsequently be articulated with specific teachings dedicated to economic and financial analysis and the evaluation of public policies. Further classes are related to the study of the regional economic context. The specific economic-financial paths focus more on the quantitative aspects related to the finance sector (both in the statistical and mathematical field), on at least two specialized economic subjects, investigating the functioning of financial markets, on further disciplines of a historical or quantitative kind, related to the functioning of the banking and credit sector. The specific paths with a public and territorial orientation favour further economic teachings in the field of applied economics and economic policy, as well as teachings of a statistical nature in the public-territorial field and business-oriented teachings in the sector of administration and management of public entities and services.

The educational program that favours the use of quantitative methods applied to economic research in a multidisciplinary context. The objective is to train economists capable of interpreting systemic and market economic phenomena, also suggesting in-depth analysis or possible lines of intervention. These professionals will be able to operate in all the autonomous professions of the economic area or as managers or officials both in the private and public sector. Some training paths enable the students interested in the profession of chartered accountant to access the respective Register according to the procedures provided for by the agreements in force.

Professional opportunities

Profile:

Economist

Functions:

Intermediate or managerial functions specialized in economic matters with responsibility functions

Skills:

Analysis of economic and financial issues and related statistical evidence

Professional opportunities:

Economic research centers or companies, research and economic and financial analysis branches of public agencies and private companies

Legenda: Per. = periodo o semestre, Val. = Valutazione (V=voto, G=giudizio), TAF= Tipologia Attività Formativa (A=base, B=caratterizzante, C=Affine, S=stages, D=a scelta, F=altre)

Profile:

Expert in regional development economic programs and plans

Functions:
