

UNIVERSITÀ DEGLI STUDI DI PALERMO

Department: Economics and statistical Sciences

A.Y. 2023/2024

DEGREE COURSE IN ECONOMICS AND BUSINESS ADMINISTRATION - BUSINESS ECONOMICS AND ADMINISTRATION (AGRIGENTO) -

Characteristics

Class of Bachelor's Degree
(BSc) on Business
administration (L-18)

3 YEARS

AGRIGENTO

PLANNED ACCESS

2225

Educational objectives

Graduates should acquire:

1. General groundings in the business-economic, general economic, mathematical-statistical and legal fields, necessary to acquire a first critical awareness of the structures, functions, processes and systems of all business types (private, public and non-profit ones), with respect to their conditions, from constitution to the termination, and the main events of operation;
2. The most important theoretical and technical issues of economic and business subjects, with respect to:
 - The institutional and administrative areas of organisation, management, survey and governance;
 - The respective most important functional sub-areas such as: (human resources selection and training, job description and evaluation, decision-making and responsibility models, Finance, Marketing, Production, Distribution, General and Analytical Accounting, Budgeting, Cost Analysis, Management Control, Planning, Reporting, Business Strategies, General and specific Policies, etc.
 - The relevant applications to the most popular classes of companies by sector (industrial, commercial, services and public administration), by size (small, medium and large), to technology (backward, mature, advanced, etc.).
3. The main competences and some related working skills which are needed for the occupational and professional opportunities specifically provided for graduates of the Course, first and foremost those aimed at their future work as accounting experts and, more generally, as business consultants.
4. Basic computing skills and written and spoken knowledge of one or two European Union languages, besides Italian.

The principles of the University system, the educational objectives of the class and the specific objectives of the course drive the educational programme to the best possible balance between the demands for methodological and content training (to be finalized towards subsequent and higher educational programmes, such as, in particular, first level University master courses, specialist courses, 2nd cycle degree courses, second level University master courses and PhD programs, as well as lifelong learning) and the skills and abilities which could be more or less immediately employable in the labour market.

The interdisciplinary versatility of the field of study of the L18 degree class and the professional and territorial variety of possible employment opportunities over time, suggest a qualified generalist approach rather than a predetermination referable to a specific sector of reference and/or type of company.

Therefore, the Degree Course provides solid common groundings in basic and class-specific subjects, together with, related and integrative subjects.

The course takes place not only in Palermo, but also in Agrigento; the latter, in particular, is designed for the territorial specificities job opportunities: business consultancy with solid legal groundings, commercial administration and promotion, small and medium-companies with highlights on the management of the organizational dynamics of these classes of companies, attention to the trends of circular economy and of social innovation.
