AMBIT	50421-Fisiopatologia, metodologia clinica, propedeutica clinica e sistematica medico-chirurgica
INDIVIDUAL STUDY (Hrs)	45
COURSE ACTIVITY (Hrs)	30
EDUCATIONAL OBJECTIVES OF THE MODULE	
EXPECTED LEARNING RESULTS Provide the student with the necessary information and skills in order to learn the diseases pertaining to General Surgery, through a correct and effective clinical approach to the patient.	
<ul style="list-style-type: none"> • Collection and compilation of accurate medical history • Execution of the general and systematic objective examination of the organs and systems • Compilation of the clinical file oriented by problems • Correct indications of the use of laboratory and instrumental examinations • Correct interpretation of the results of laboratory and instrumental examinations • Strict diagnostic reasoning method • Being able to clearly communicate the acquired knowledge and have developed the learning skills that allow them to continue to study independently • Be able to present yourself to the patient with sufficient correctness and confidence • Communicate empathically with the patient • Communicate correctly with the various figures of the healthcare staff • Use medical terminology correctly and ductilely. 	

SYLLABUS

Hrs	Frontal teaching
30	Presentation of the Course. The medical record. Peritonitis. Intestinal occlusion, diverticular disease of the large intestine and its complications. The benign and malignant diseases of the Thyroid of surgical interest. Surgical pathologies of anus and rectum (hemorrhoids, anal-perianal fistula, anus-rectal abscesses, anal fissure). Learning of the pathologies of surgical relevance according to the hospitalized patients integrated with video aids and simulators and seminars.

EDUCATIONAL OBJECTIVES OF THE MODULE

The module aims to help the student to develop a method of reasoning and of work based on scientific evidence and on the rational and critical of the information collected with the patient's physical examination, with laboratory and instrumental methods.

The student will learn the methodology approach to the patient suffering from wound and surgical infections, and the main diseases of the abdominal wall, esophagus and diaphragm, using properly and critically the most important diagnostic methods, from the least to the most invasive, especially in light of the cost / benefit ratio, useful basis for subsequent integrated courses.

SYLLABUS

EDUCATIONAL OBJECTIVES OF THE MODULE

The module aims to help the student to develop a method of reasoning and of work based on scientific evidence and on the rational and critical of the information collected with the patient's physical examination , with laboratory and instrumental methods .

The student will learn the methodical approach to the patient with abdominal pathologies of surgical interest such as diverticulitis, inflammatory bowel diseases and parasitic diseases. The student will learn, also, the correct method of approach to abdominal trauma and surgical diseases of the stomach, small intestine, large intestine and pancreas, using them properly and critically the most important diagnostic methods, from the least invasive to the more invasive, in the light of the cost / benefit ratio, useful premise for subsequent integrated courses.

SYLLABUS

Hrs	Frontal teaching
4	Stomach and duodenum
2	Small intestine: • Short Bowel Syndrome • Meckel's diverticulum and omphalo - mesenteric residues • Actinic enteritis
2	Chronic inflammatory bowel disease
5	Colon • megacolon • polyposis • Diverticulosis
6	Rectum and anal canal
2	Pancreas
2	Obesity
1	Sinus pilonidalis
2	Infectious and parasitic diseases of surgical interest
2	Abdominal trauma • liver Plot • Trauma splenic • Hemoperitoneum • Coleperitoneo
2	Spleen and lymph nodes

EDUCATIONAL OBJECTIVES OF THE MODULE

The module aims to help the student to develop a method of reasoning and of work based on scientific evidence and on the rational and critical of the information collected with the patient's physical examination , with laboratory and instrumental methods . The student will learn the methodical approach to the patient suffering from major abdominal conditions such as peritonitis, acute appendicitis, bowel obstruction, gastrointestinal bleeding, cholelithiasis, cholecystitis, cholangitis, abdominal abscesses. The student will learn, also, the method of approach to diseases of the breast, neck, thyroid and parathyroid, using them properly and critically the most important diagnostic methods, from least invasive to most invasive, in the light of the cost / benefit ratio useful basis for subsequent integrated courses.

SYLLABUS

Hrs	Frontal teaching
2	Clinical and instrumental diagnosis in surgery: • Diagnostic imaging • Digestive Endoscopy • biopsies and cytology
7	Breasts: • Semiotics • Instrumental clinical diagnostics in senology • congenital and developmental abnormalities Malformations • breast Inflammatory diseases • mammary dysplasia
5	Bowel obstruction.
3	Acute abdominal pain. Peritonitis
2	Appendicitis
5	Liver and biliary system: • Clinical and physical examination • functional and instrumental diagnostics epatic diseases and biliary tract of surgical interest • Surgical Jaundice • Abscesses • biliary calculi • acute and chronic cholecystitis • Cholangitis • Fistulas biliary-digestive
2	Neck: • swelling • Cysts and fistulas
2	Thyroid: • Functional Semiotics • Instrumental Clinical Diagnostics • Gozzo • Thyroiditis
2	Parathyroid: • Instrumental Clinical Diagnostics • Hyperparathyroidism • Hypoparathyroidism
