# DOCENTE: Prof. RENATO VENEZIA

PREREQUISITES	Knowledge of English , anatomy and physiology of the male and female , of the major diseases of the human organism and all welfare issues related to the scope of competence of the Integrated Course
LEARNING OUTCOMES	Knowledge and ability 'to understand At the end of this module, students should be able to understand the importance of the attivita 'of the manager within the mateno-child. Capacity 'to apply knowledge and understanding Have acquired the ability 'to apply their knowledge, understanding the situations contingent to the work environment, being able to play the activities' of its authority and to organize other professional autonomy. Making judgments Being able to evaluate the implications and complexity 'in the specific area. Enable 'communication Acquiring skills' relational such as being able to compare a multidisciplinary team and have effective tools of communication to send a successful conclusion within its competence projects. Capacity 'Learning Being able to adjust their skills on the activity 'of the module specification according to updated guidelines and validated, and regional and national legislation.
ASSESSMENT METHODS	est Type: Oral examination. The test is intended to assess whether the student possesses knowledge and understanding of the topics of the integrated teaching / running program, independent judgment, ability 'to apply the acquired knowledge, discipline-specific language. minimum number of questions: The student must 'answer at least three questions posed orally, which will cover all the topics of the integrated teaching / course program, with reference to the recommended texts. Evaluation and its criteria: Evaluation and 'thirty, as shown in the diagram below. Outcome Rating Rating Excellent A - A + Excellent 30-30 laude Excellent knowledge of teaching content; the student demonstrates high analytic-synthetic capacity and is able to apply the knowledge to solve problems of high complexity excellent B Very good 27-29 Good knowledge of teaching content and excellent properties of language; the student demonstrates analytical-synthetic capacity and able to apply the knowledge to solve problems of medium complexity and, in some cases, even high Good C Good 24-26 Good knowledge of teaching content and good properties of language; the student is able to apply the knowledge to solve problems of medium complexity discreet D Satisfactory 21-23 Good knowledge of teaching content, in some cases limited to the main topic; acceptable ability to use the specific language of the discipline and independently apply the knowledge acquired Enough IS Sufficient 18-20 Minimum knowledge of teaching content, often limited to the main topic; modest ability to use the specific language of the discipline and independently apply the knowledge acquired Enough IS Sufficient 18-20
TEACHING METHODS	lectures, exercises , group work

#### MODULE CLINICAL APPROACH TO COMPLEX PATIENTS AND COMPLICATIONS

To provide students with epidemiological and pathophysiological knowledge, in the field of internal medicine, for the recognition and clinical management of complex patients and to define the role of obstetric nursing care.

Hrs	Frontal teaching
4	Definition of complexity, definition and management of a complex patient. Definition of urgency and emergency. Definition of the critical patient and clinical signs. Definition and identification of dyspnea and orthopnea. Shock: definition, physiopathology, clinical signs, role of the nurse and of the obstetrician in the cardiogenic, anaphylactic, hypovolemic, neurogenic shock. Therapy notes.
4	Syncope: definition and clinical signs. Stroke. Coma: Definition, physiopathology, symptoms, therapy notes and role of the nurse in diabetic coma: ketoacidosis, hyperosmolar, lactic acidosis, hypoglycemic. Hypoglycemia: causes, signs and symptoms. Chronic liver diseases, hepatic encephalopathy and coma. Chest pain: definition of somatic and visceral chest pain.
4	Symptoms of chest pain, role of the nurse in diseases causing chest pain. Angina pectoris, myocardial infarction. Pericarditis, dissecting aortic aneurysm, pneumothorax. Pleuritis, pulmonary embolism. Diagnosis of myocardial infarction and role of the nurse. Complications of myocardial infarction: acute pulmonary edema
4	Definition of hyper- and hypokinetic arrhythmias, cardiac tamponade: diagnosis and nursing planning. Hypertension: definition, hypertensive symptoms and emergencies. Sudden death. Dyspnea and respiratory diseases, with particular reference to bronchial asthma and chronic obstructive pulmonary diseases
4	Respiratory failure. CID (Disseminated intravascular coagulation), definition and signs, therapy notes. Digestive bleeding, the Hellp syndrome. Liver failure, cirrhosis. Acute kidney failure.
4	Chronic renal failure. Endocrine disorders: hypo- and hyperthyroidism, adrenal insufficiency. Arterial blood gas analysis.Emogas arterial analisys

## SYLLABUS

#### MODULE CLINICAL OBSTETRICS AND GYNAECOLOGY

Prof. RENATO VENEZIA

SUGGESTED BIBLIOGRAPHY	
Ginecologia e Ostetricia Zanoio-Barcellona-Zacche' Ed. Elsevier Masson 2007	
АМВІТ	20380-* Scienze ostetriche
INDIVIDUAL STUDY (Hrs)	51
COURSE ACTIVITY (Hrs)	24
EDUCATIONAL OBJECTIVES OF THE MODULE	

Basics of anatomy and physiology of the female genital tract .

the modalities ' of childbirth eutocico , and its related diseases , major diseases of pregnancy and pregnancy-related illnesses .

know the principal gynecological pathologies and contraceptive methods . sterility ' of torque. endocrine disorders of women.

SYLLABUS	
Hrs	Frontal teaching
2	anatomy and physiologist of the female genital
4	fertilization, implantation , fetal annexes , the embryo-fetal development signs
2	physiology and hygiene of pregnancy
2	twin pregnancy
1	physiology of childbirth
4	abnormalities of the duration and site of the pregnancy
4	diseases in pregnancy, fetal infections
1	diabetes in pregnancy
2	hypertension in pregnancy preeclampsia
2	the menstrual cycle
2	menopause
2	organic and functional metrorragie
2	medically assisted fertilization

## MODULE CARE COMPLEXITY IN GYNAECOLOGY AND MIDWIFERY

Prof.ssa MARIA ANTONELLA AUCI

EDUCATIONAL OBJECTIVES OF THE MODULE

To know and understand the structure of organizational, management and health care processes and their analytical tools - to know and understand the salient features of health organizations and the determinants of their functioning - to know and understand recent and innovative experiences in the development and implementation of pathways Integrated Clinics-Understanding the influence of the individual and community's cultural and anthropological differences in the planning and design of competent care services.

To elaborate complex analyzes and to contribute to the organization of assistance and services, in the specific profession, through the definition of priorities, the appropriate use of the resources available, delegating to the employees the competence activities, ensuring continuity and quality of care - Ability to design and organize welfare services while respecting the differences in culture and values of belonging.

# SYLLABUS

Hrs	Frontal teaching
4	Definition of health organization - Organizational processes - The Infant Maternal Department
4	Communication in organizational processes - Systemic and multidimensional organizational analysis
4	Definition of the network of services for continuity of care
4	The Rite of Care - A Guide to Anthropology of Assistance
4	Anthropological aspects of mind and thought in relation to health and illness
4	Analysis of clinical care pathways - Reasonable analysis of clinical care pathways.
