

UNIVERSITÀ DEGLI STUDI DI PALERMO

DEPARTMENT	Scienze Psicologiche, Pedagogiche, dell'Esercizio Fisico e della Formazione		
ACADEMIC YEAR	2018/2019		
MASTER'S DEGREE (MSC)	SCIENCE OF PREVENTIVE AND ADAPTED PHYSICAL ACTIVITY AND SPORT PERFORMANCE		
INTEGRATED COURSE	PHYSICAL EXERCISE PLANNING IN DISABILITIES - INTEGRATED COURSE		
CODE	17884		
MODULES	Yes		
NUMBER OF MODULES	2		
SCIENTIFIC SECTOR(S)	MED/33, M-EDF/01		
HEAD PROFESSOR(S)	BATTAGLIA GIUSEPPE	Professore Associato	Univ. di PALERMO
OTHER PROFESSOR(S)	BATTAGLIA GIUSEPPE	Professore Associato	Univ. di PALERMO
	IOVANE ANGELO	Professore Associato	Univ. di PALERMO
CREDITS	12		
PROPAEDEUTICAL SUBJECTS			
MUTUALIZATION			
YEAR	1		
TERM (SEMESTER)	2° semester		
ATTENDANCE	Not mandatory		
EVALUATION	Out of 30		
TEACHER OFFICE HOURS	<p>BATTAGLIA GIUSEPPE Tuesday 10:00 12:30 Si informano i prenotati che il ricevimento studenti si svolgera tramite Microsoft teams collegandosi a RICEVIMENTO STUDENTI PROF. G BATTAGLIA utilizzando il seguente codice di accesso.: 5b3x17r</p> <p>IOVANE ANGELO Wednesday 11:30 13:00 Via pascoli secondo piano</p>		

DOCENTE: Prof. GIUSEPPE BATTAGLIA

PREREQUISITES	Knowledge of theory and methodology of training
LEARNING OUTCOMES	<p>Students have demonstrated knowledge and understanding in a field of study that builds upon in tennis and athletics their general secondary education, and is typically at a level that, whilst supported by advanced textbooks, includes some aspects that will be informed by knowledge of the fore front of their field of study.</p> <p>Students can apply their knowledge and understanding in a manner that indicates a professional approach to their work or vocation in tennis and athletics, and have competences typically demonstrated through devising and sustaining arguments and solving problems within their field of study;</p> <p>Students have the ability to gather and interpret relevant data, usually within their field of study (tennis and athletics) to inform judgements that include reflection on relevant social, scientific or ethical issues.</p> <p>Students can communicate information about tennis and athletics, ideas, problems and solutions to both specialist and non-specialist audiences;</p> <p>Students have developed those sports specific learning skills that are necessary for them to continue to undertake further study with a high degree of autonomy.</p>
ASSESSMENT METHODS	<p>Oral-practical exam. The student will have to answer at least 2-4 questions in the oral and practical form. The exam aims at verifying technical-tactical knowledge, interpretative competence and autonomy of judgement of concrete cases.</p> <p>The passing grade threshold will be considered reached if the student shows to have acquired the topics of the specific subject matter and is able to solve specific concrete cases as well as to correctly convey knowledge with satisfactory expository skills. Below the above-mentioned threshold, the exam will be considered unsatisfactory. The more the student can interact with his/her examiner showing mastery of language, of the specific subject matter and ability to convey his/her knowledge of the topics of the specific field of reference, the more the assessment will be positive. The latter will be expressed by 18 to 30-30 with honours marks.</p> <p>The assessment has a final grade included in the following range: 30-30 with honours (excellent), corresponding to 'excellent knowledge of topics, excellent use of language, good analytical skills, the student can implement his/her knowledge to solve the submitted issues'; 26-29 (very good), 'good mastery of topics, very good use of language, the student can implement his/her knowledge in order to solve the submitted issues'; 24-25 (good), corresponding to 'basic knowledge of the main topics, fair use of language, with moderate capability to independently implement knowledge to solve the submitted issues'; 21-23 (satisfactory), 's/he doesn't possess full mastery of the main teaching topics but s/he possesses knowledge of them, satisfactory use of language, poor capability to independently implement the acquired knowledge'; 18-20 (passing grade), 'very poor basic knowledge of both the main teaching topics and the technical skills, no or very poor capability to independently implement the acquired knowledge'; unsatisfactory, 's/he doesn't possess an acceptable knowledge of the contents of the topics dealt with during the course'.</p>
TEACHING METHODS	Frontal lectures, exercises

MODULE
LOCOMOTOR SYSTEM DISEASES AND RELATED IMAGE DIAGNOSTICS

Prof. ANGELO IOVANE

AMBIT	50537-Biomedico
INDIVIDUAL STUDY (Hrs)	108
COURSE ACTIVITY (Hrs)	42

EDUCATIONAL OBJECTIVES OF THE MODULE

Acquisition of the imaging competences related to sports and exercise training
Acquisition of imaging terminology.
The educational aims of the course are aimed at providing students with the necessary knowledge of orthopedic disorders and trauma, in evolutionary and age adults, with particular attention to joint damage and muscle-tendon more frequent in sports. For each considered to be set out the disease etiology, with specific reference to the incorrect gestures sports, clinical, specific signs for the identification of the damage, imaging, essential to the definition of a correct diagnosis, and therapy, whether medical, surgical or physiotherapy. They will not leave out the necessary prevention rules necessary to reduce the incidence of diseases of the musculoskeletal system and the acquisition of the essential methods of post-traumatic immobilization.

SYLLABUS

Hrs	Frontal teaching
6	presentation of the course with directions to the program to be carried out and its development Physical principles of imaging methods: effects of biological effects of ionizing radiation Possibilities, limits, directions in several imaging method
6	Contraindications and risks of different imaging modalities Elementary knowledge about the anatomical Clinical characteristics of the different radiological methods with reference to the apparatus muscle - tendon bone and joint
8	Traumatic joint, direct and indirect muscular and tendon and shoulder pathology secondary to sport from clinical diagnosis to imaging
3	elbow disorders, hand and wrist secondary to sport from clinical to imaging
3	Pathologies of the spine secondary to sport from clinical to imaging
3	Pathology of sports overload from clinical to imaging
3	hip disease and secondary pubic region to sport from clinical to imaging
3	secondary diseases of the knee to the sport from clinical to imaging
3	Pathologies of the ankle and foot secondary to sport from clinical to imaging
2	Main prevention rules necessary to reduce the incidence of diseases of the musculoskeletal system Notions of therapy, -the diseases previously treated with the acquisition of the essential methods of post-traumatic immobilization. Integrated diagnostic algorithms for situation assessments most common clinical

MODULE
SCIENCE AND TECHNIQUE OF ADAPTED MOTORIAL AND SPORT ACTIVITY

Prof. GIUSEPPE BATTAGLIA

INDIVIDUAL STUDY (Hrs)	98
COURSE ACTIVITY (Hrs)	52

EDUCATIONAL OBJECTIVES OF THE MODULE

The course aims to provide theoretical and practical knowledge on the training methods depending on age, gender, and the morphological characteristics of the subjects and the type of disability

SYLLABUS

Hrs	Frontal teaching
3	Presentation of the course. Adapted physical activity (APA): a pluralistic concept
3	Traditional medical classifications: physical disabilities (spinal cord, brain injuries, amputations, Les Autres, functional classifications)
3	Traditional medical classifications: sensory impairment (vision and hearing), and intellectual and relational disabilities
3	The methodological principles of the APA
3	The European program of the APA
3	The wheelchair basketball: analytical study of the player in a wheelchair, the push technique, the individual basic attack with the ball and without the ball, the classification of the IWBF, the methodology of training in wheelchair basketball
3	The sitting volleyball: analytical study of the sitting volleyball player, the basic game with ball and without the ball, the sitting volleyball rules, the methodology of training in athletes of sitting volleyball
2	The adapted physical activity for people with cardiovascular disease
3	The adapted physical activity for people with metabolic syndrome
4	Examples of technical and practical exercises in wheelchair basketball
4	Examples of technical and practical exercises in sitting volleyball
4	Examples of technical and practical exercises for subjects with physical disabilities
4	Examples of technical and practical exercises for subjects with hearing disability
4	Examples of technical and practical exercises for subjects with visual disability
4	Examples of technical and practical exercises for subjects with intellectual and relational disabilities
