EDUCATIONAL OBJECTIVES OF THE MODULE

The course is designed to provide learners with an appropriate theoretical-methodological framework of reference through which to exercise a critical view of the world and of otherness in respect of the different cultural codes that are increasingly confronted in complex societies in relation to the concepts of body and health.

- a) The most significant areas of study of the sociology of cultural processes and the notions of culture, identity, health, and sport in a comparative perspective will be investigated;
- b) We will study the notions of rites of passage and body (natural, cultural and modified) and the symbolic and ritual aspects connected to nutrition demonstrating how the alimentary act of feeding is not only an answer to physiological but also social necessity. and identity, therefore, cultural.
- c) The Roma community will be investigated, with particular reference to the context of Palermo, in order to show the forms of marginality acting and the stereotyping action of cultural representations.
