TEACHING METHODS	english version under construction

MODULE INTERNAL MEDICINE - MODULE I

Prof. ANTONINO TUTTOLOMONDO - Sede CHIRONE, - Sede CHIRONE

SUGGESTED BIBLIOGRAPHY

-Goldmann-Cecil Medicina Interna ,ventiseiesima edizione
Rugarli Medicina Interna Sistematica-Ottava edizione

AMBIT	50421-Fisiopatologia, metodologia clinica, propedeutica clinica e sistematica medico-chirurgica
INDIVIDUAL STUDY (Hrs)	75
COURSE ACTIVITY (Hrs)	50

EDUCATIONAL OBJECTIVES OF THE MODULE

knowledge of the clinical findings and of pharmacologic therapy of the main diseaseses in the field of Internal Medicine

SYLLABUS

Hrs	Frontal teaching
2	Unknown origin fever
2	Brucellosis, Thyfus, rickettsiosis
2	acute joint rheumatism
2	Stille Disease
2	Macrophage activation syndrome (MAS)
2	Leishmaniosis
2	infective endocarditis
2	pericarditis and miocarditis
4	cardiovascular risk estimation in patients at high cardiometabolic risk
2	ischemic stroke : another disease in the field of the Internal Medicine
2	Emerging therapies for Congestive Heart Failure
2	Novel oral anticoagulants in Internal Medicine
2	antimicrobial therapy of Pneumonia
2	Infective mononucleosis

MODULE INTERNAL MEDICINE - MODULE I

Prof. ANTONIO CARROCCIO - Sede IPPOCRATE, - Sede IPPOCRATE

SUGGESTED BIBLIOGRAPHY

Rugarli
Harrison

AMBIT	50421-Fisiopatologia, metodologia clinica, propedeutica clinica e sistematica medico-chirurgica
INDIVIDUAL STUDY (Hrs)	75
COURSE ACTIVITY (Hrs)	50

EDUCATIONAL OBJECTIVES OF THE MODULE

The objective is the recognition of the main clinical pictures of internal medicine and the discussion of clinical cases

SYLLABUS

Hrs	Frontal teaching
50	Clinical cases in Gastroenterology Cases in Cardiology Cases in Rheumatology Cases in infectious diseases Cases in Pneumology

MODULE GERIATRICS

Prof. EMILIO NARDI - Sede CHIRONE, - Sede CHIRONE

SUGGESTED BIBLIOGRAPHY

- Senin U. Paziente Anziano e Paziente Geriatrico.
- Vergani C. Note pratiche di diagnosi e terapia per l'anziano.
- Harrison. Principi di Medicina Interna. Casa editrice ambrosiana.

AMBIT	50421-Fisiopatologia, metodologia clinica, propedeutica clinica e sistematica medico-chirurgica
INDIVIDUAL STUDY (Hrs)	45
COURSE ACTIVITY (Hrs)	30

EDUCATIONAL OBJECTIVES OF THE MODULE

The aim of the course is to train the student in such a way to acquire the ability to consider the following elements that characterize specific aspects of Geriatrics and Gerontology within the Internal Medicine discipline: the role of geriatric medicine in the practice of internal medicine; the geriatric approach methodology and its instruments; the risk of iatrogenic damage that limit therapeutic margin and requires continuous monitoring and frequent adjustments; the peculiarities' presentation of major diseases according to age.

SYLLABUS

Hrs	Frontal teaching
30	1. Demography; 2. The process of aging; 3. Fragility; 4. The aging of the main systems; 5. The elderly cardiovascular diseases; 6. Cognitive decline; 7. Nutrition; 8. Osteoporosis; 9. Falls and syncope; 10. Pharmacotherapy in the elderly; 11. End of Life; 12. The network of services.

MODULE INTERNAL MEDICINE - MODULE II

COURSE ACTIVITY (Hrs)	50

EDUCATIONAL OBJECTIVES OF THE MODULE

Medicine is a broad branch of medicine that deals with diagnosing and treating very different pathologies and addressing them from the medical point of view, as opposed to more purely surgical. Internal Medicine teaching must allow students to learn and professional knowledge in the fields of medical physiopathology, functional and instrumental medical semeiotics, clinical methodology, knowledge-based medicine, general medical clinic and medical therapy with specific expertise in medical medicine, emergency and first aid. Educational objectives are the acquisition of a theoretical knowledge in the clinical and instrumental diagnosis of the most common internal pathologies, of the fundamental knowledge of physiopathology of the various organizations and systems, the theoretical and practical knowledge necessary for the recognition of diseases that affect the different systems of the organism, the theoretical and practical knowledge of the main fields of instrumental and laboratory diagnostics relating to the aforementioned diseases, the acquisition of the ability to evaluate internal and specialist connections and influences. He must therefore be able to recognize the symptoms and clinical-functional signs with which diseases of various organs and systems occur, having acquired the fundamental diagnostic, therapeutic, psychological and ethical knowledge necessary for a global vision of the patient.

SYLLABUS

Hrs	Frontal teaching
5	Arterial hypertension, definition, pathophysiological conditions, clinic, hypertensive emergencies, therapy
5	Cardiovascular risk estimation in patients at high cardiometabolic risk
5	Atherosclerosis, Acute Coronary Syndrome, chronic ischemic heart disease. Clinical, diagnostic and therapeutic process
3	Congestive heart failure, emerging therapies
3	Infective endocarditis, pericarditis, myocarditis
3	Atrial fibrillation, the new oral anticoagulants in Internal Medicine
3	Leukopenizing fevers, brucellosis, typhus, Rickettsiosis
3	Infective mononucleosis
3	Acute and chronic renal failure, etiopathogenesis, clinical therapy, chronic renal disease, staging
5	THYROID, ANATOMY, FUNCTIONS, MAIN PATHOLOGIES AND DYSFUNCTIONS
5	ACUTE AND CHRONIC RESPIRATORY INSUFFICIENCY, CHRONIC OBSTRUCTIVE BRONCHOPNEUMOPATHY, BRONCHIAL ASTHMA
3	Anemias, classification, etiopathogenesis, therapy
4	Shock: definition, pathophysiology, septic shock, MOF (multi organ failure)
