

# UNIVERSITÀ DEGLI STUDI DI PALERMO

DEPARTMENT	Scienze Economiche, Azie	ndali e Statistiche	
ACADEMIC YEAR	2021/2022		
BACHELOR'S DEGREE (BSC)	ECONOMICS AND FINANCE		
INTEGRATED COURSE	APPLIED ECONOMICS - INTEGRATED COURSE		
CODE	16505		
MODULES	Yes		
NUMBER OF MODULES	2		
SCIENTIFIC SECTOR(S)	SECS-P/06		
HEAD PROFESSOR(S)	CUSIMANO ALESSANDRO	Ricercatore a tempo determinato	Univ. di PALERMO
OTHER PROFESSOR(S)	CUSIMANO ALESSANDRO	Ricercatore a tempo determinato	Univ. di PALERMO
CREDITS	10		
PROPAEDEUTICAL SUBJECTS			
MUTUALIZATION			
YEAR	3		
TERM (SEMESTER)	Annual		
ATTENDANCE	Not mandatory		
EVALUATION	Out of 30		
TEACHER OFFICE HOURS	CUSIMANO ALESSANDRO Monday 11:00 14:00 I	Dipartimento SEAS - V Piano -	Stanza n.3

### **DOCENTE:** Prof. ALESSANDRO CUSIMANO

DOCENTE: Prof. ALESSANDRO CUSIMANO		
PREREQUISITES	microeconomics and macroeconomics	
ASSESSMENT METHODS	Knowledge and understanding Knowledge of the basic tools used in applied economics, with particular focus on quantitative aspects necessary for the analysis and solution of economic problems. In particular:  Introduction to Behavioural Economics. Altruism and economic choices  Behavioural Economics. Cognitive limitations and consumer behaviour  Introduction to policy evaluation  Policy evaluation methods and the evaluation design  Behavioural policy — The role of the State and Behavioural Economics applications  Applications  Application of policy evaluation methods for binary treatment. Evaluation of the effects of public aid to firms  Application of policy evaluation methods for continuous treatment. Evaluation of the effects of place-based policies  Location Theory: Physical-metric space  Theories of Regional Growth: Uniform-abstract space  Theories of Regional Growth: Uniform-abstract space  Theories of Regional Growth: Diversified-relational space  Theories of Regional Growth: Diversified-relational space  Measurement of Specialization, concentration and diversification for regional economies  Productivity, regional growth and their interconnectivities  Ability to apply knowledge and understanding  Know how to read properly an economic problem and to choose the appropriate analytical and quantitative tools.  Making judgments  Ability to use the analytical tools of economics to formulate interpretative hypotheses, obtain strategic information, make decisions under uncertainty.  Communication skills  Ability to explain choices and communicate the results of analysis with appropriate language and at the right level of detail. Ability to interact with experts and stakeholders and to modulate the language according to the interlocutors. Ability to work individually and in groups.  Learning ability  Ability to explain choices and communicate the results of analysis with appropriate language and at the right level of detail. Ability to interact with experts and stakeholders and to modulate the language according	
	in the course.	

# MODULE MICROECONOMICS

AMBIT	10705-Attività formative affini o integrative
INDIVIDUAL STUDY (Hrs)	64
COURSE ACTIVITY (Hrs)	36

### **EDUCATIONAL OBJECTIVES OF THE MODULE**

The course's main objective is to present and apply to concrete cases the basic tools used in applied microeconomics, with particular focus on the quantitative aspects necessary for the analysis and solution of economic problems. Moving from the idea that economics is a behavioral science that analyzes human decisions under uncertainty, the course articulates the basic tools useful to identify the best solutions to problems of choice and to interpret economic phenomena. In addition, the course also aims to outline the basic concepts of microeconomics and policy evaluation to equip students with the necessary interpretative categories for individual behavior and economic phenomena.

### **SYLLABUS**

31LLAD03		
Hrs	Frontal teaching	
4	Introduction to Behavioural Economics. Altruism and economic choices	
8	Behavioural Economics. Cognitive limitations and consumer behaviour	
4	Introduction to policy evaluation	
8	Policy evaluation methods and evaluation design	
Hrs	Practice	
6	Application of policy evaluation methods for binary treatment. Evaluation of the effects of public aid to firms	
6	Application of policy evaluation methods for continuous treatment. Evaluation of the effects of place-based policies

INDIVIDUAL STUDY (Hrs)	90
COURSE ACTIVITY (Hrs)	60

### **EDUCATIONAL OBJECTIVES OF THE MODULE**

The course's main objective is to present and apply in simplified examples the basic tools used in macroeconomics, with particular focus on the quantitative aspects necessary for the analysis and solution of economic problems. Moving from the idea that economics is a behavioral science that analyzes human decisions under uncertainty, the course articulates the basic tools useful to identify the best solutions to problems of choice and to interpret economic phenomena. In addition, the course also aims to outline the basic concepts of macroeconomics to equip students with the necessary interpretative categories for individual behavior and economic phenomena.

### **SYLLABUS**

STELABOS		
Hrs	Frontal teaching	
7	Location Theory: Physical-metric space	
7	Theories of Regional Growth: Uniform-abstract space	
7	Theories of Local Development: Diversified-relational space	
3	Theories of Regional Growth: Diversified-stylized space	
Hrs	Practice	
12	Introduction to Stata, information, variables, and datasets management.	
12	Measurement of Specialization, concentration, and diversification for regional economies.	
12	Productivity, regional growth, and their interconnectivities.
