

UNIVERSITÀ DEGLI STUDI DI PALERMO

DEPARTMENT	Matematica e Informatica		
ACADEMIC YEAR	2023/2024		
MASTER'S DEGREE (MSC)	MATHEMATICS		
INTEGRATED COURSE	MATHEMATICS DIDACTICS AND TEACHING METHODOLOGY		
CODE	19862		
MODULES	Yes		
NUMBER OF MODULES	2		
SCIENTIFIC SECTOR(S)	MAT/04		
HEAD PROFESSOR(S)	CERRONI CINZIA	Professore Ordinario	Univ. di PALERMO
OTHER PROFESSOR(S)	CERRONI CINZIA	Professore Ordinario	Univ. di PALERMO
	DI PAOLA BENEDETTO	Professore Associato	Univ. di PALERMO
CREDITS	6		
PROPAEDEUTICAL SUBJECTS			
MUTUALIZATION			
YEAR	1		
TERM (SEMESTER)	1° semester		
ATTENDANCE	Not mandatory		
EVALUATION	Out of 30		
TEACHER OFFICE HOURS	CERRONI CINZIA Monday 15:00 17:00 Dipartimento di Matematica e Informatica Stanza 105 Wednesday 12:30 14:00 Dipartimento di Matematica e Informatica Stanza 105 Thursday 12:30 14:00 Dipartimento di Matematica e Informatica Stanza 105 DI PAOLA BENEDETTO Friday 14:00 15:00 Per confermare data, orario e sede del ricevimento e' necessario contattare il Docente per e-mail.		

DOCENTE: Prof.ssa CINZIA CERRONI

PREREQUISITES	No prerequisite
LEARNING OUTCOMES	<p>The student has to know and has to be able to analyze the main teaching methodologies developed in research in mathematics education and in the history of mathematics, also with reference to the specific role of the teacher, to the conceptual, epistemological, linguistic and teaching nodes of teaching and learning of mathematics .</p> <p>The student has to be able to design teaching methodologies for the construction of activities and more generally of a mathematics curriculum consistent with the objectives set by national guidelines for high schools and for the first cycle and by the guidelines for technical and professional institutes</p>
ASSESSMENT METHODS	<p>Oral examination. Marks (or grades) are expressed on a scale of 30 points There is an intermediate nonobligatory examination in the form of a seminar. The interview will begin with a subject of one's choice and will continue with two or three questions on the whole examination program. The intermediate seminar will contribute to the final evaluation. We use the following Assessment Scheme: Insufficient: the student does not have an acceptable knowledge of the topics. 18-20: The student has a general knowledge and understanding of the topics; he/she has just adequate communication skills. 21-23: The student has an adequate knowledge and understanding of the topics; he/she has satisfactory communication skills. 24-26: The student has a fair knowledge and understanding of the topics; he/she has good communication skills. 27-29: The student has a good knowledge and understanding of the topics; he/she has very good communication skills. 30-30 cum laude: The student has an excellent knowledge and understanding of the topics; he/she has excellent communication skills.</p>
TEACHING METHODS	Lessons

MODULE
TEACHING METHODOLOGIES IN MATHEMATICS DIDACTICS

Prof. BENEDETTO DI PAOLA

AMBIT	20947-Attività formative affini o integrative
INDIVIDUAL STUDY (Hrs)	51
COURSE ACTIVITY (Hrs)	24

EDUCATIONAL OBJECTIVES OF THE MODULE

- Knowledge and understanding
- Acquisition of knowledge and teaching skills related to the discipline;
 - Awareness of the role of problem solving as a fundamental element for the mathematics thought.
- Applying knowledge and understanding
- Ability to develop, implement and "criticize" educational paths realized on mathematics misconceptions and obstacles.

SYLLABUS

Hrs	Frontal teaching
3	Specific Education (disciplinary) and General Education: Learning Mathematics.
6	Framework for Math Education: theoretical aspect and examples in Research Education.
6	<p>Knowledge and Skills in Mathematics.</p> <ul style="list-style-type: none"> - Argumentation and Proof in Mathematics - Errors and Knowledge in Mathematics - BES and Learning process - Artefacts and problem solving.
4	Misconception, obstacles and teaching/learning didactic situation: example at Secondary School
5	Examples of experimental research in Math Education. Critical analysis.

MODULE
TEACHING METHODOLOGIES IN MATHEMATICS HISTORY

COURSE ACTIVITY (Hrs)	24

EDUCATIONAL OBJECTIVES OF THE MODULE

The student has to know the main teaching methodologies developed in the research in the history of mathematics, also with reference to the specific role of the teacher, in relation to the teaching / learning of mathematics.

The student has to be able to critically analyze the main teaching methodologies developed in research in the history of mathematics, related to the teaching / learning of mathematics.

SYLLABUS

Hrs	Frontal teaching
6	The history of mathematics in teaching in the authors of the past. J.L. Lagrange, F. Klein, F. Enriques, F. Severi, etc.
5	The history of mathematics in teaching: the "geneticist" method
5	The history of mathematics in teaching as a narration
4	The history of mathematics in teaching to give the discipline its cultural and intercultural dimension
4	Educational paths of the history of mathematics in teaching
