OTHER PROFESSOR(S)	CAPPELLO GIANNA MARIA	Professore Associato	Univ. di PALERMO
CREDITS	12		
PROPAEDEUTICAL SUBJECTS			
MUTUALIZATION			
YEAR	1		
TERM (SEMESTER)	2° semester		
ATTENDANCE	Not mandatory		
EVALUATION	Out of 30		
TEACHER OFFICE HOURS	CAPPELLO GIANNA MARIA Thursday 17:00 19:00 la piattaforma Teams. La prenotazione online e' obbligatoria. Si prega di specificare nelle note il motivo del ricevimento. Il giorno stesso del ricevimento si prega di inviare alla docente un messaggio privato nella chat Teams per segnalare la presenza. La docente richiamera' secondo l'ordine di invio del messaggio.		

PREREQUISITES	It is sufficient to have the general knowledge and competence acquired during high school
LEARNING OUTCOMES	<p>KNOWLEDGE AND CAPACITY OF UNDERSTANDING Gain knowledge and understanding of the constituent aspects of the communication process and the different forms and methods of communication (interpersonal communication, mass communication and computer-mediated communication). Acquire basic knowledge and understanding of the main theoretical sociological approaches regarding communication and digital media, of their role and effects in contemporary society. A particular attention will be given to acquire knowledge and understanding of the issues related to the relationship between media, children and educational processes, as well as to the history and recent evolutions of television within a context of multimedia "convergence".</p> <p>CAPACITY TO APPLY KNOWLEDGE AND UNDERSTANDING Through reflection and debate in class, the course aims at developing the students' capacity to apply knowledge and understanding to specific case studies. In particular the students will apply the theoretical knowledge acquired in the first part of the course to the "reading" of the production, distribution and reception process of media cultures, dealing in particular with the study of phenomena that they themselves experience in their own everyday life experience. Through these applications, the students will strengthen their ability to adapt what they have learned to the analysis of similar contexts.</p> <p>INDEPENDENT JUDGEMENT Ability to develop independent judgments with reference to both the general issues addressed during the course, and the impact of the knowledge and competence acquired in the communicator profession. The student will be expected to deal with some current issues relating to the construction of culture through new media, thereby enhancing its ability to develop autonomous interpretation of the role that new media and the whole industry of digital productions and services have taken and will take in the sector of the processing and dissemination of information globally.</p> <p>COMMUNICATION SKILLS Through the presentation and discussion in class of case studies and group work regarding the issues covered in the course students will develop their communication skills both with regards to other students and to the professor. They will achieve the ability to illustrate the issues relating to sociological aspects of communication and digital media using the pertinent and specific language of the discipline. The acquisition of a specific language, as required by the course, will strengthen the communication skills of the student, preparing also to play - after graduation - research and consultancy in the field of computer-mediated communication in contact with public and private operators and to participate as an expert in new media in political institutions, administrative bodies, museums, healthcare, schools, etc.</p> <p>LEARNING ABILITY The course aims to develop the students' awareness and ability to learn about the issues related to communication in general and in particular to the production, distribution and reception of culture as a socially constructed phenomenon, "mediated" by the new info-communication technologies, thereby so strengthening the students' ability to learn new techniques and advanced knowledge tools to address such issues in the future path of study and work for continuous updating of knowledge.</p>
ASSESSMENT METHODS	<p>The assessment methods include written tests consisting of open-ended questions aiming at ascertaining the possession of knowledge and critical understanding of the course topics. A complete and thorough study of the textbooks will enable the student to develop a detailed answer to the questions. The judging criteria for the correction of the answers are three, in order of importance:</p> <ul style="list-style-type: none">- Correctness: the student must respond pertinently and appropriately to what is written in the textbooks. Any personal observation must follow this. Wrong answers lead to cancellation of the answer.- Completeness: answers must be as exhaustive as possible in dissecting aspects of the subject matter of the question. Too general or incomplete answers involve a low grade.- Conciseness: the student has to go right to the point, avoiding turns of phrase and general introductions. <p>In addition, thanks to classroom discussion of case studies addressed through group work and exercises, it will be possible to assess the acquisition of the ability to apply knowledge and critical understanding to real cases, as well as independence of judgment and communication skills.</p> <p>Grade will be given according to the following criteria:</p>

	<p>EXCELLENT (30 - 30 cum laude) - If the student shows an excellent knowledge of the topics, property of language and analytical capacity, and also if the student is able to apply excellently the knowledge acquired to solve the problems proposed.</p> <p>VERY GOOD (27-29) - If the student shows a very good mastery of the topics, a very good property of language and analytical capacity, and also if the student is able to apply very satisfactorily the knowledge acquired to solve the problems proposed.</p> <p>GOOD (24-26) - If the student shows a good knowledge of the main topics, property of language and capacity to apply the knowledge acquired to solve the problems proposed.</p> <p>MORE THAN SUFFICIENT (21-23) - If the student shows a more than sufficient knowledge of the main topics, property of language and capacity to apply the knowledge acquired to solve the problems proposed.</p> <p>SUFFICIENT (18-20) - If the student shows a sufficient knowledge of the main topics, property of language and capacity to apply the knowledge acquired to solve the problems proposed.</p> <p>INSUFFICIENT (less than 18) - if the student shows an insufficient knowledge of the main topics, property of language and capacity to apply the knowledge acquired to solve the problems proposed.</p> <p>The assessment will be done either through an intermediate written test during the semester or through the regular exams as scheduled in the didactic calendar.</p>
TEACHING METHODS	Lectures using multimedia aids; case studies; group work.

MODULE SOCIOLOGY OF COMMUNICATION

Prof.ssa GIANNA MARIA CAPPELLO

The selection of the textbooks may change. Changes will be notified at the beginning of the course. Therefore, before buying any book, please wait for the beginning of the course.

AMBIT	50089-Discipline sociali e mediologiche
INDIVIDUAL STUDY (Hrs)	110
COURSE ACTIVITY (Hrs)	40

EDUCATIONAL OBJECTIVES OF THE MODULE

The course aims to develop knowledge and understanding of the main theoretical approaches and constitutional aspects of the communication process in its various forms and modes (interpersonal, mass, computer-mediated). As a specific focus, it will present and analyse the history, social impact and digital transformations of television, as well as the relationship between digital technologies and children.

SYLLABUS

Hrs	Frontal teaching
6	Interpersonal communication, mass communication, computer-mediated-communication
6	Italian television as public service broadcasting: from origin to the golden age of Bernabei
5	The rise of commercial television and the decline of RAI monopoly
5	The new forms and formats of digital television and web television
6	The relationship between technology and society: from technological determinism to the social construction of technology
4	Places, practices and identities of digital social action
6	The "participatory cultures" and creativity of youth and adolescents on the web
Hrs	Practice
2	Exercises and case studies

MODULE SOCIOLOGY OF NEW MEDIA

Prof.ssa GIANNA MARIA CAPPELLO

AMBIT	50089-Discipline sociali e mediologiche
INDIVIDUAL STUDY (Hrs)	110
COURSE ACTIVITY (Hrs)	40

EDUCATIONAL OBJECTIVES OF THE MODULE

The course aims to systematize and develop today's debate on digital media by linking the social uses and practices of the media with some of the most important reflections of contemporary social theory. The analysis of our everyday experience with digital media is placed in the middle of a critical reading of the relationship between media, society and power, and the new forms of inequality, the new asymmetries and injustices that are being created. This critical reading will be integrated and problematized by the presentation and analysis of the new scenarios of the "cultural convergence" as well as the new consumption/production practices that new digital technologies make possible.

SYLLABUS

Hrs	Frontal teaching
4	Digital media and social reality
4	Media as social practice
4	Media as rituals and social formations
2	Politics on the internet. A new "public sphere"?
4	Media and the transformation of the capital and authority
2	Media ethics, media justice
4	Culture and society: the digital media "revolution" and the shift from the web 1.0 to the web 3.0.
4	Postcinema: forms, modes, practices and technologies of the audiovisual media in the new digital infosphere.
4	Web video: the new forms and strategies of narration in the digital infosphere.
4	Trends and perspectives for the future
Hrs	Practice
4	Exercises and case studies
