Only if the student chooses to take the intermediate tests, the mark of the latter will affect the final grade, which will be stated and communicated to the student at the end of the oral exam.</p> <p>Final oral exam.</p> <p>The candidate should answer at least two/three questions regarding the whole syllabus with the exception of the topics covered by the intermediate test. The final assessment aims to value whether the student has acquired the knowledge and the ability to comprehend the topics dealt with during the lessons. Students will pass the final exam if they show knowledge and understanding of the topics in general terms and have minimal application skills to solve concrete cases. The candidate is evaluated according to the level of his knowledge and receives an assessment out of thirty as final grade (the pass mark is 18/30).</p> <p>The final mark will take into account the marks of the intermediate tests eventually passed by the student; in more detail, the final grade will be determined considering the mathematical average of the marks obtained in all written and oral tests.</p>
